PREFACE

This report is one in a series on Soviet Ground Force and Logistic installations being prepared for a DIA/CIA Panel. The series is being coordinated, published and disseminated by NPIC. The photographic analysis is being performed by the NPIC Photographic Analysis Group, the CIA Photographic Intelligence Division (NPIC), and the Production Center 1P1a (DIA). The photographic analysis for this particular report was performed by the NPIC Photographic Analysis Group.

In the interest of uniformity, the titles and letter designators for the facilities observed at these installations are identical with those appearing in the project requirement. When a specific facility is not observed both its title and letter designator are omitted in the report.

Titles and letter designators for the various facilities are as follows: (A) railroad service, (B) road service, (C) landing strips, (D) administrative and troop housing areas, (E) storage areas, (F) ammunition storage areas, (G) POL storage areas, (H) other buildings and facilities, (J) equipment storage/maintenance areas, (K) athletic fields, (L) small arms firing ranges, (M) driver training areas, (N) tank/assault gun firing ranges, (P) flat trajectory firing ranges, (Q) artillery emplacements (batteries), (R) infantry or combined arms field training area or courses, (S) special training facilities, (T) unidentified facilities or tracking activity.

SUMMARY

An artillery training school is located 15 kilometers (km) northeast of Berdyansk (Figure 1).

The area covers approximately 5,445 acres and contains 4 administration buildings, 14 barracks, 37 support buildings, and approximately 1,110 probable tent bases. Training facilities include 1 wheeled-vehicle driver-training course and 3 areas for anti-aircraft artillery training including 11 well-defined AAA batteries (Figures 2 and 3).

The area was covered by mis-

sions. Comparative analysis revealed the following changes: a wheeled-vehicle driver-training course was constructed and an area used for emplacement training, 2 areas containing probable tent bases, and 8 AAA batteries were constructed. The level of activity has fluctuated from light to heavy in period and back to medium. No winter training was observed.

DESCRIPTION OF INSTALLATION

25X1D
25X1D

Road Service

The area is connected to Berdyansk and Zhdanov by probable all-weather secondary roads.

Driver-Training Area

Area M is a wheeled-vehicle driver-training course which was constructed. track activity was extensive; however, on later coverage, track activity decreased to a low level, indicating this course may be no longer active.

Administration and Troop Housing Areas

Area D1 contains 2 administration buildings, 3 barracks, 20 support buildings, and approximately 175 probable tent bases.

Area D2 contains 4 barracks, 11 support buildings, and approximately 400 probable tent bases.

Area D3 contains 2 administration buildings, 7 barracks, 5 support buildings, and approximately 535 probable tent bases.

The probable tent bases in Area D1 and northeast of the barracks in Area D3 were added.

Artillery Emplacements

Areas Q1-Q3 contain an undetermined number of AAA firing positions. Area Q2 also contains 1 support building. The areas show signs of extensive training. Area Q1 was first observed on coverage. Area Q4 contains 11 AAA batteries. Several other AAA positions are visible but appear inactive and unserviceable. Eight of the 11 batteries were constructed.
